

CVCC Summer Camp

“Discover IT”

Lesson Plans for Wednesday:

8:00 – 8:45 (30 minutes):

Using GIMP

We are going to use the digital photos we took of the students on Tuesday and alter a copy of them using the GIMP open source, graphic editing program. Students will follow the teacher as we explore the various basic editing tools in GIMP.

<http://www.youtube.com/watch?NR=1&v=9bMJH6aQsw&feature=endscreen>

8:45 – 9:30 (45 minutes):

Microsoft Paint

Using Microsoft Paint, students will create a background to eventually move a picture of their face to. After creating the background, students will learn how to use the lasso tool in GIMP to move their face to the background. Students will then print their picture in color and glue them to their poster board.

9:30 - 10:00 (30 minutes):

Weebly Website 1

Students will learn basic website design using Weebly.

10:00 – 10:15 Break (Cafeteria)

10:15-11:00 (45 minutes):

Weebly Website 2

Students will continue to use Weebly to finish and publish their website

11:00-12:00 (1 hour):

HTML

Students will learn basic HTML code.

12:00-12:30 Lunch

12:30-1:15 (45 min):

Computer Programming

1:15-1:50 (35 minutes)

MineCraft

Students continue to learn how to use the MineCraft software. Students will use the resources they collected on Tuesday to upgrade the houses that they previously started. They will add a pool, create underground tunnels, make libraries inside their houses, and create another house somewhere else in the world with their name on it.

1:50 – 2:00 (10 minutes):

Clean-up and Dismiss
